Aqua

Water contains all of the magic on this planet, and it's the driving force behind all life. Turritella seacones are a type of seashell with a cone-like shape characterized by their intricate spiral patterns. With the Aqua series, we take a shot at recasting these perfect forms under the sea and on the shore.

Aqua brings the beauty of the natural world into your spaces. It is an absolute pendant lamp that spreads direct light and is also an excellent final touch for your dining or bar table.
