

# Maze

We all seek for mountains to climb, oceans to cross and castles to conquer. In search of a new quest, we need our own paths to follow. What if the path you're walking is just a part of a many pathed puzzle maze to entice and confuse you? What if the road you're taking faces you with brick walls? What if there are demons to battle? What if all your candles are burnt out? What if you feel like you're in a constant state of moving nowhere? Will you be afraid like you're a random, ordinary visitor, or will you be a devoted adventurer who unquestionably needs to and must find the way out?

Searching for the answers to these questions led us to the creation of Maze. We were deeply inspired by that symbolic and ceremonial pathway of labyrinths while we were thinking of our daily and seasonal cycles in life and death. We used glass and wood together, and a series of LEDs for the illumination. Its form and shape can change to many geometrical figures and its size can be extended or downscaled. Changes and adaptations to your space at your request is always possible - just let us know.

Get into the Maze. Follow the unknown, take the chance; find the light.
